

# BIOMEDICAL RESEARCHER (FEMALE/MALE/DIVERS)

**Full time position starting in Dezember 2023/ January 2024**

We believe in building a future where preclinical experiments are highly automated, scalable, close to the clinical reality of diseases, and the cost of failing is low. We believe in making drug development flywheels and precision medicine a reality. Our team strives to offer more reliable, clinically oriented tools for human disease modelling and testing of potential therapeutics. At NORGANOID we are building a versatile high-throughput microfluidic organ-on-chip platform and offer research services in the preclinical phases. To build the future of drug development and precision medicine we are looking for a Biomedical Researcher to join our team.

## YOUR RESPONSIBILITIES:

- Designing and executing laboratory experiments in various research projects.
- Implementing cell culture techniques and performing detailed biochemical analyses.
- Analysing, interpreting, and synthesizing experimental results.
- Innovating and establishing modern laboratory procedures and methods.
- Documentation and presentation of laboratory results in a clear, precise manner for the team and stakeholders.
- Overseeing specific areas of research projects and ensuring their successful execution.

## YOUR PROFILE:

- Master's degree in molecular biology, biochemistry, or a closely related field.
- Hands-on laboratory experience with a comprehensive understanding of standard molecular techniques such as Western Blot and PCR.
- Basic experience in sterile cell culture technique and familiarity with immunohistochemistry. Experience with human cell culture is an advantage.
- Proficiency in English (written and spoken); knowledge of German is a desirable plus.
- Exceptional organizational skills combined with natural problem-solving ability.
- Meticulous attention to detail, ensuring accuracy in documentation and records.
- Demonstrated ability to consistently produce reliable and independent data.
- Strong sense of responsibility to complete tasks and projects with integrity.
- Enthusiasm for contributing to the establishment and growth of new ventures.
- Flexible and adaptable mindset.
- Availability to occasionally work on weekends to ensure the continuity of critical experiments.

## **WE OFFER:**

- Work within a vibrant interdisciplinary and international team at the Medical Science City of Graz.
- Opportunity for an impactful career in the rapidly evolving biotech sector.
- Competitive salary of €3,500 gross per month.
- A unique opportunity to shape the future of medicine.

## **WHAT WE VALUE:**

We seek individuals with a genuine passion for biomedical research, an eagerness to collaborate, and the resilience to adapt in a fast-paced environment. Join our team and contribute to groundbreaking discoveries.

If this sparks your interest, please send us your resume and motivational letter to [office@norganoid.com](mailto:office@norganoid.com). Let's shape the future together today.
